

Oregon's Electric Vehicle Industry

Oregon has captured international attention from automakers as an ideal launch market for newly developed electric vehicles, and we have attracted millions of dollars in federal funding to build out our charging infrastructure.

Dozens of Oregon companies are already selling products throughout the electric vehicle supply chain, including batteries, components, charging stations, software, and full-fledged vehicles ranging from electric bicycles to trucks and streetcars.

Accelerating Industry Growth

Drive Oregon is working with these diverse businesses, stakeholders, and policy makers to build on this momentum, ensuring that Oregon maximizes the economic development benefits of this emerging new industry.

Drive Oregon is one of several Oregon Innovation Council initiatives supporting innovation and long-term economic growth, and is funded in part with Oregon State Lottery Funds administered by Business Oregon.

Join Drive Oregon!

Your membership and active involvement in Drive Oregon will play a key role in growing Oregon's electric vehicle industry, creating local jobs and reducing our reliance on foreign oil. Direct benefits of membership include a free informational newsletter, special member events and educational opportunities, business development and marketing support, and representation in regulatory and public policy settings.
